

# AirFly Pro

## Use AirPods or wireless headphones where you normally can't.

Plug AirFly Pro into the headphone jack on a plane to watch live TV or a new movie with your favorite wireless noise-cancelling headphones. Connect AirFly Pro to the treadmill headphone jack to use your AirPods with the TV at the gym. You can also pair two sets of AirPods or wireless headphones with AirFly Pro so two people can listen to the same movie, podcasts or video game. Think of AirFly Pro as a headphone splitter for wireless headphones.

### Key facts:

- Connects your AirPods or wireless headphones to wired devices like in-flight entertainment systems
- Pair two sets of AirPods or wireless headphones to one device for shared listening
- Receives audio from your iPhone to the AUX IN in rental cars, boats and non-bluetooth speakers
- Built-in battery lasts 16+ hours and recharges via USB-C
